RELIABILITY IS EVERYTHING

N & F SERIES BULLBAR

**GET A
PERFECT FIT,
NOT A
COUNTERFEIT.**

EFFECTIVE
AUG 2017

FULL ASSEMBLY ROBOT WELDING

An automatic robot weld cell completes high precision and complex welds with 100% repeatability on all bullbars. This world-class robot capability ensures consistent weld quality, accuracy and visual finish.

IN-PROCESS INSPECTION

During the production process components are continuously assessed and measured by both man and machine. This highly controlled production environment ensures the final product meets and exceeds the stringent Isuzu global quality standards.

LINISHING AND POLISHING

A fully enclosed automated finishing and polishing cell achieves a precise surface finish. Laser calibration prior to every cycle ensures high accuracy and identical parts. Final polishing by experienced technicians is performed in purpose-built temperature controlled sealed booths to ensure a final product with industry leading high quality appearance.

FINAL PRODUCT INSPECTION AND MEASUREMENT

Batch samples are inspected under high lumen lighting and a computerised Coordinate Measuring Machine (CMM) is used to assess dimensional accuracy. Combining this CMM process with programed validation of weld penetration, customers can have complete confidence in the integrity of the Isuzu genuine bullbar.

NOW YOUR ISUZU CAN BE JUST AS POLISHED ON THE OUTSIDE.

From cab to engine to safety features, Isuzu Trucks are filled with smarts that make them brilliantly polished performers. And now there's a bullbar to match. The Isuzu Trucks approved genuine accessory bullbar was developed and designed from scratch over three years to perfectly follow the lines of your truck, adding to

the already great looks. But this new design doesn't just look good. Its precision manufacturing process, including robotic welding and meticulous Macro weld testing, has created a bullbar that also works in perfect partnership with Isuzu airbags.

Designed specifically for Australian conditions.

Styled to integrate seamlessly with truck design.

Incredibly strong one-piece pressed bumper.

Crash and vibration tested by Isuzu Japan.

Australian made.

Replaceable upper structure.

Performance optimised with computer-aided Finite Element Analysis (FEA).

Constructed using precision robotic welding and polishing.

Air bag and Australian Design Rule (ADR) compliant.
