Warning

- While driving, do not continuously look at the multimedia screen or adjust it. Please drive with respect to road conditions and pedestrians.
- While driving, do not carry out any activities requiring high levels of concentration such as adjusting a setting.
- Operate the system while the vehicle is at a full stop. While driving, some capabilities are disabled and so you cannot operate them.
- Do not hold or operate a mobile phone whilst driving.
- While driving, keep the audio volume at a level where you can hear your surroundings.
- Always be careful when consuming liquids and other substances in the vehicle. This can cause damage to the product.
- Do not use this device for a long period time after turning the engine off. This may cause discharging of the battery in the vehicle.
- Do not expose device to shock. This may cause damage to the touch screen.
- When cleaning the touch screen, turn off the unit and use the soft cleaning cloth provided. Please do not use cloths such as those made with hard, chemical, or oiled materials (alcohol, benzine, etc.). This may damage or distort the surface of the unit.
- Do not disassemble or repair the system. If problem exists, please refer to trouble shooting section of this manual or contact your place of purchase for advice.
- This product is subject to change without notice.

 **Warning**

Please do not insert a separate USB device which supplies power to the multimedia USB port.

DAB+(DIGITAL AUDIO BROADCASTING)

Digital radio is a new, exciting and involving way for listeners to tune into their favourite radio stations.

Offering an exceptionally high sound and signal quality, digital radio offers a range of exciting features to enhance your listening experience.

- Clearer sound and improved reception.

- More choice of stations available including chill, comedy, dance, country and many more!

- Tuning by station name, not frequency, making it easy to find favourite stations.

- Scrolling text on screen with artist and song information, weather and news updates and much more!

Digital radio is subject to reception performance due environmental influences and Distance from broadcast area. You may experience signal “drop outs” in very low lying Areas such as valleys. You may also experience “drop outs” as you begin to move away From metropolitan areas. This is not a fault with your ISUZU AVN SYSTEM. As the network grows, reception performance will improve.

It is important to periodically scan for new DAB stations to enhance your Digital Radio experience.

More information regarding DIGITAL RADIO can be found at the following web site!

Recorded Audio (Ripping)

Ripping is the process of copying audio content to Internal flash memory.

In Australia and New Zealand a copy of all forms of media may be made as long as it is not distributed to others and its use remains personal.

Ripping such data usually involves reformatting it and optionally compressing it during the extraction process.

1-1. Buttons

**1 Home**

Main menu screen is displayed.

If you hold this button for more than 1.5 seconds the LCD turns off however, the current mode will continue to play with Audio still presented.

- ▶ Default : The Audio settings are restored to factory settings
- ▶ EQ Display : This shows the EQ mode currently selected.
- ▶ LOUD : Loud On / Off.

● Default

Selecting this button restores all the settings to factory settings.

3-4 Video

Press the VIDEO button on the SETUP mode screen.

● Camera

If cameras are installed to the multimedia system, Mirror or normal image can be selected.

- ▶ Camera ON : All cameras ON.
- ▶ Camera OFF : All cameras OFF.
- ▶ Camera Mirror : Select to display Mirror image.
- ▶ Default : Resets camera settings to factory settings.

● Rear

A separate rear screen can be connected to the multimedia system.

- A. Select the Rear button on the right in the Video Settings window.
- B. Set Rear Source to either ON or OFF.
- C. Select one of the following DVD/iPod/AUX for output to a rear screen.
- D. Press the +/- button to make adjustments to the volume control of the rear output media.

● AUX

Select to switch between Front and Rear Auxiliary input.

- ▶ Front : Connect to the Front AUX socket.
- ▶ Rear : Connect to the Rear AUX socket.

i The purchase and installation of either Front or Rear Auxiliary cable is required to allow this feature to function. These can be purchased at your nearest Isuzu dealership.

● Display

- A. Select the Display button on the right.
- B. The Display Settings window appears.
- C. Set the Brightness and Contrast of the screen to your desired level.

3-5 Information

Press the INFORMATION Button on the SETUP mode screen.

This will display version numbers of the operating system and applications.

When the RADIO button is selected in the main menu screen, radio station information is displayed.

i When the unit is turned on for the first time after the battery is connected, FM mode will be displayed by default.

4-1. Structure of the AM/FM Mode Main Display

- ① STEREO Indicator
- ② LOC Indicator (Local)
- ③ TP Indicator (Traffic program identification)
- ④ TA Indicator (Traffic Announce)
- ⑤ AF Indicator (Alternative Frequency)
- ⑥ REG Indicator (Regional)

i TP / TA / AF / REG may not function in some areas.

- ⑦ PRESET Indicator : Current preset number is displayed if a frequency has been saved.
- ⑧ FM/AM Indicator : Displays the current band.
- ⑨ : Manual station search. (FM : 0.1MHz, AM : 9kHz)

10   : Automatic station search.

11 **Function Button:** Changes to the radio mode screen. (SCAN, BSM, LOCAL, RDS)

 Radio station information is only available in the FM band.
Some Radio stations may not broadcast this information.

12 **BAND Button :** FM1 - FM2 - FM3 - AM1 - AM2 can be selected via this button.

13 **Frequency sign :** Displays the current frequency.

4-2. Structure of the AM/FM Mode Menu Display

●Function

From the Radio mode screen, press the FUNCTION button.

■SCAN : By pressing this button, the unit will begin searching.

Once a station is found, the unit will broadcast it for 10 seconds then begin searching again.

■BSM : By pressing this button, the unit will search six stations with the strongest signal and saves them into each preset automatically.

■LOCAL : By pressing this button, LOC is displayed and only the stations with strong signals are searched.

■RDS(Radio Data System)

- **TA** : Turns TA (Traffic Announcements) on/off.
If turned on, traffic broadcasting will be automatically played over the current mode. When the traffic broadcast ends, the unit returns to the current mode. Does not operate in AM Mode.
- **AF** : Alternative Frequencies for the same station. Turns AF on/off.
If turned on, the unit attempts to seamlessly keep playing the current station as you keep moving through an area. This occurs even if the broadcasting station broadcasts on different frequencies through those areas.
- **REG** : Turns REG(Regional) on/off. With REG On, you can only choose Regional broadcasts. With REG Off, you can choose both Regional and National broadcasts.

TP/TA/AF/REG may not function in some areas.

4-3. Searching for AM/FM Frequencies

● Finding Frequencies from the Preset List

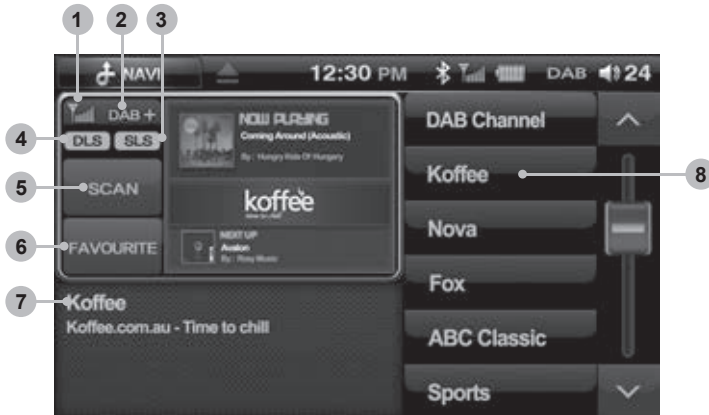

This function allows you to select AM/FM frequencies you've saved previously.

- A. On the radio display, choose your desired frequency by pressing Preset button 1~6.
 - B. The selected frequency will appear on the display.
- **Saving a frequency to Preset**
- A. You can save the station you are currently listening to via the preset buttons 1~6.
 - B. Begin searching for a desired frequency then press and hold the required preset button until the frequency is saved.

1. Select the DAB+ button.
2. This takes you to the DAB mode and the device begins to receive signals provided the unit has been scanned for stations.

5-1. DAB Mode Window Components

- 1 **Signal Strength Display:** Indicates the signal strength of the digital Radio station.
- 2 **Mode Display:** Indicates the mode you are currently in.
- 3 **SLS Display:** Indicates the ON/OFF status of SLS (Broadcast of pictures).
- 4 **DLS Display:** Indicates the ON/OFF status of DLS (Broadcast of text).
- 5 **Scan Button:** Scans live DAB broadcast channels.
- 6 **Favourite Button:** Displays your favourites saved as presets.
- 7 **Channel Name Display:** Displays the name of the DAB station you are currently listening to.
- 8 **Preset Button:** Displays your favourites saved as presets.

5-2. DAB Mode Basic Actions

●Searching DAB stations from the Channel List

A. Press the SCAN button to search for DAB stations in your area.

B. Then, select the DAB station directly from the display.

i A. It is important to periodically scan for new DAB stations to enhance your Digital Radio experience.

B. After scan is complete, your favourite radio stations will need to be re-saved in the preset buttons.

●Searching Broadcasts Using Favourites

You can enjoy DAB channels you've already saved.

A. After searching for DAB stations with the SCAN button, select the station you would like to add to your favourites list.

B. Add the station to your desired preset number by holding the preset button down for more than 1.5 seconds.

C. You can select each preset channel by pressing briefly on a preset button.

D. There are 3 favourite groups each containing 6 presets.

Press the Favourite button to display each favourite group.

●DLS (Dynamic Label Service)

●SLS (Slide Show Service)

Press the picture to display full screen.

By Pressing the  button, the previous/next channel inside the channel list will start to play.

1. When you insert a DISC, you are automatically transferred into DISC mode.
After reading the DISC, you are taken to the play window and the DISC starts playing from track 1.
2. If a Disc is already inserted and you are in a different mode, select the DISC button from the Main menu.
The unit will begin playing from where it left off.

6-1. Components of the CD Mode Display

- 1 **Format:** Indicates the current mode and format.
- 2 **Scan Play:** Indicates whether the scan function is on or off.
- 3 **Repeat Play:** Indicates whether the repeat function is on or off.
- 4 **Random Play:** Indicates whether the random function is on or off.
- 5 **Track List:** Displays the [current track/total tracks] number of the CD
- 6 **Title:** Displays the title of the song being played.
- 7 **Artist:** Displays the artist of the song being played.
- 8 **Album:** Displays the album of the song being played.
- 9 **Genre:** Displays the genre of the song being played.
- 10 **Play Time:** Displays the play time of the song.
- 11 **Total Time:** Displays the total play time of the song.

- 1 **Folder Button:** Enters the media folder list.
- 2 **SCAN Button:** Plays the first 10 seconds of the track and then moves onto the next one.
- 3 **RPT Button:** Repeat function on or off.
- 4 **RDM Button:** Random function on or off.
- 5 **Previous Button:** Skips to the previous track.
- 6 **Play/Pause Button:** Play or pauses the track.
- 7 **Next Button:** Skips to the next track.

6-2. CD Mode Basic Actions

●Pause/Play

- A. To pause a song, press the pause button on the display.
- B. To begin playing again, press the play button on the display.
- C. Forwarding and Rewinding with the progress bar.

To fast forward or rewind press the progress bar whilst the file is playing.

●Choosing the CD Track

To move to the next or previous track press  or  on the display.

●Choosing a track from the track list

- A. Press the list folder button to display the Disc track list.
- B. Search the tracks by pressing the arrow buttons up or down.
- C. The selected track number appears on the window and the song begins to play.

● Repeating a Track using the RPT Button

- A. Select the RPT  button.
- B. The Repeat icon lights up  and the track repeats.
- C. Selecting the RPT button again will turn the icon off  and will restore the setting to repeat all.

● Playing a Track using the SCAN button

- A. Press the SCAN  button.
- B. The Scan icon lights up  and each track will be played for 10 seconds.
- C. Pressing the SCAN button again cancels the SCAN play function.

● Playing Tracks in Random

- A. Press the RDM  button.
- B. The Random icon lights up  and the tracks begin to play in random order.
- C. Pressing the Random button again cancels the Random play function.

1. When you insert a DISC, you are automatically transferred into DISC mode.
After reading the DISC, you are taken to the play window and the DISC starts playing from main menu of the DVD.
2. If a Disc is already inserted and you are in a different mode, select the DISC button from the main menu.
The unit will begin playing from where it left off.

7-1. DVD Mode Operations Menu Window Components

- 1 **Title Number:** Displays the number of the title being played.
- 2 **Chapter Number:** Displays the chapter number being played.
- 3 **Play Time:** Displays the play time of the title being played.

- 9 **FF Button:** Plays the current chapter at speeds of x2, x4, x8, x16 forwards.
- 10 **Previous Button:** Plays the previous chapter.
- 11 **Next Button:** Plays the next chapter.
- 12 **Next Menu Button:** Enters the next menu window.
- 13 **Screen:** To enter full screen mode, press the movie screen.

Warning

For your safety, this unit does not support video clip replay whilst you are driving.

7-2. DVD Mode Basic Actions

● Selecting the DVD Title/Root Menu

- By selecting the Title Menu or Root Menu Button, you can return to the DVD menu.
- Select the Navigation button to display the DVD menu navigation keys.

- Once you have highlighted a function within the menu, select the OK button to enter.

● Searching Titles/Chapters

- Select the button to enter the search menu screen. The menu window will appear.
- Select the Search button.
- The search window will appear.
- Erase the current title by pressing the button and then insert the desired title number.

Press the OK button and the entered Title will begin to play.

- Select the button.
- Erase the current chapter by pressing the button and then insert the desired Chapter number. Press the OK button and the entered Chapter will begin to play.

● Pause/Play

A. To pause the DVD, press the  button on the display.

B. To begin playing again, press the  button on the display.

● Skipping Chapters

To move to the next or previous chapter, press  or  on the display.

● Playing the Current Chapter Fast

To fast forward or rewind press  or  whilst the DVD is playing.

After each press the speed will increase or decrease x2, x4, x8, x16. The speed will be displayed on the center of the screen.

● Angle Settings

A. Press the  button.

B. Press the  button.

C. This displays the currently selected angle settings.

Select the desired angle by pressing the Angle Button multiple times.

 This function is only possible for DVD titles with multiple angles.

● DVD Settings

- Expanding and Reducing the DVD screen
Touch the screen to enter full screen.

i Each time you touch the screen, the screen will move back and forth between full screen and previous menu screen.

● Audio language settings

- Press the  button.
- Press the  button.
- Depending on the DVD the Audio language can be changed by pressing the button multiple times.

● Subtitle settings

- Press the  button
- Select the desired subtitle language by pressing the button multiple times.

1. When you insert a DISC, you are automatically transferred into DISC mode. After reading the DISC, you are taken to the play window and the DISC starts playing from main menu of the VCD.
2. If a Disc is already inserted and you are in a different mode, select the DISC button from the main menu. The unit will begin playing from where you left off last time.

8-1. VCD Mode Window Components

- ① **Track Number:** Displays the current track number.
- ② **Play Time:** Displays the play time of the title being played.
- ③ **Play/Pause Button:** Pause or play the VCD.
- ④ **REW Button:** Plays the video file at speeds of x2, x4, x8, x16 backwards.
- ⑤ **FF Button:** Plays the video file at speeds of x2, x4, x8, x16 forwards.
- ⑥ **Previous Button:** Plays the VCD previous track.
- ⑦ **Next Button:** Plays the VCD next track.
- ⑧ **Search Button:** Enters the search menu.

Warning

For your safety, this unit does not support video clip replay whilst you are driving.

8-2. VCD Mode Basic Action

●Pause/Play

- To pause the VCD, press the pause button on the display.
- To begin playing again, press the play button on the display.

●Skipping Tracks

To move to the next or previous VCD FILE, press or on the display.

●Searching Tracks

- Select the button to enter the search menu screen.

- The following search window will appear.

- Erase the current VCD FILE by pressing the button and then insert the desired track number.

Press the OK button and the entered VCD FILE will begin to play.

- To move to the next or previous VCD FILE, press or on the display.

●Playing the Current VCD FILE Fast

To fast forward or rewind press or whilst the VCD is playing.

After each press the speed will increase or decrease x2, x4, x8, x16.

The speed will be displayed on the center of the screen.

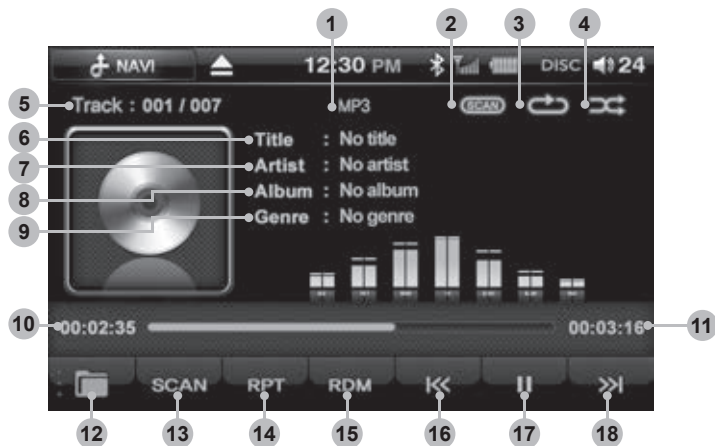

1. When you insert a DISC, you are automatically transferred into DISC mode. After reading the DISC, you are taken to the play window and the DISC starts playing from main menu of the CD.
2. If a Disc is already inserted and you are in a different mode, select the DISC button from the main menu. The unit will begin playing from where you left off last time.

i It may take a while for the DISC to play because the device first collects data about the DISC files before playing the DISC.

You can speed up this time by saving less data on the DISC or organizing the files in a very simple manner.

9-1. MP3/WMA Mode Window Components

- 1 Format:** Indicates the current mode and format.

Select the RPT  button.

- A. The Repeat icon lights up  and the file repeats.
- B. Selecting the  button again will turn the icon off  and will restore the setting to repeat all.

● Playing a file using the SCAN button

- A. Press the SCAN  button.
- B. The Scan icon lights up  and each file will be played for 10 seconds.
- C. Pressing the  button again cancels the SCAN play function.

● Playing files in Random

- A. Press the RDM  button.
- B. The Random icon lights up  and the files begin to play in random order.
- C. Pressing the Random button again cancels the Random play function.

 If the disc does not contain ID3 tag, Title, Artist, Album or Genre information will not be displayed.

9-3. MOVIE Mode Window Components

i Please ensure movie file resolution size is no larger than 720X480 otherwise movie will not play!

- 1 Title:** Displays the time and title of the current file.
- 2 Folder Button:** Return to the media folder list.
- 3 Play/Pause Button:** Plays or pauses your video.
- 4 Previous Button:** Skips to the previous file.
- 5 Next Button:** Skips to the next file.
- 6 Total Time Display:** Displays the total play time of the video.
- 7 Play Time Display:** Displays the play time of the video.

⚠ Warning

For your safety, this unit does not support video clip replay whilst you are driving.

Press the **X** button, to return back to the file list.

9-4. MOVIE Mode Basic Actions

- **Pause/Play**

To pause a movie, press the pause button on the display.
To begin playing again, press the play button on the display.

- **Forwarding and Rewinding with the Progress Bar.**

To fast forward or rewind press the progress bar whilst the file is playing.

- **Choosing the File**

To move to the next or previous file press  or  on the display.

- **Expanding and Reducing the Movie screen**

Touch the screen to enter full screen.

 Each time you touch the screen, the screen will move back and forth between full screen and previous menu screen.

- **Choosing the File from the Folder List**

A. Press the Folder list button and file list will be displayed.

- B. You can search the files by pressing the scroll arrow buttons up or down.
- C. The selected file number appears on the window and the movie starts to play.

⚠ Warning

Connecting a Standard iPod cable to the external USB hub will not allow iPod to function correctly.
 A proprietary cable must be purchased from your ISUZU parts dealership.
 See page 80 Accessory options.

1. Connect your iPod to the unit via an Isuzu iPod cable connected to the front or rear USB socket.
2. Select the iPod Mode by pressing on the iPod Button in the main menu screen.
3. The loading screen appears and the iPod is connected.

- After reading the iPod, the iPod screen will be displayed.
- Because the device first collects information about the iPod files first, it may take a while before playing.

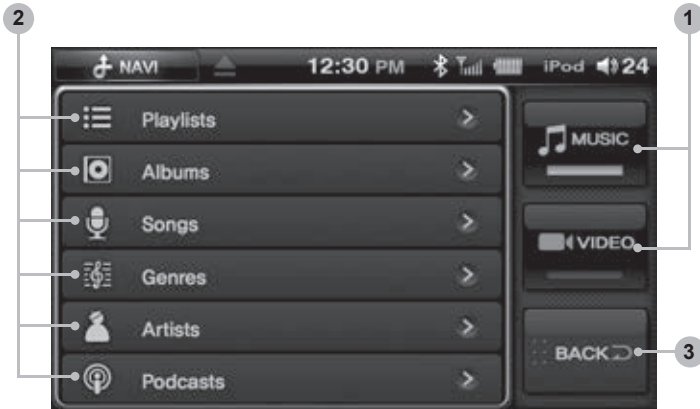

You can shorten the time before play by reducing the amount of files in the iPod or organizing the files in a simple manner.

10-1. iPod Mode Display Components

- 1 **Mode:** Indicates the mode currently playing.
- 2 **File Type:** Indicates the format file the iPod is playing.
- 3 **Repeat Play:** Indicates whether the Repeat function is on or off.
- 4 **Random Play:** Indicates whether the random function is on or off.

Four separate screens are displayed as shown below.

B. If the vehicle has the reverse trigger cable installed, camera A will automatically activate when reverse gear is selected.

The unit will show image A until a forward gear is selected again.
The unit will then revert back to the previous mode.

C. To view various cameras via split screen mode.

Three separate screens : Select three screens out of the four cameras (if installed).
The images are displayed as a split screen shown below.

Two separate screens : Select two screens out of the four cameras (if installed).
The images are displayed as a split screen shown below.

D. You can further select individual images to see full screen.

i External audio can only be heard through camera "A" input.
The audio can be adjusted via the main volume knob.

17-1. BT Audio

Press the BT AUDIO button in the Main menu screen.

- ▶The mobile phone must support this function in order for this to function.
- ▶Using this function you can listen to music on your mobile phone through the Unit.
- ▶Press play on the unit to begin streaming music from your mobile phone.
- ▶If play does not begin, go to your mobile phone music player and begin playing music.

 Please note some functions may not operate due to your mobile phone not supporting these functions.

Telematics

- ▶Future Developments

The AVN unit can be operated by using Voice Recognition mode. Please follow the points below to assist with smooth operation of this mode.

- ▶ Please check the voice commands on the following pages to operate this system.
- ▶ If you touch any button or the screen whilst voice recognition is running, the mode will exit.
- ▶ Speaking clearly will assist voice recognition.

● Basic action of voice recognition system

Press the  button for few seconds to enter the voice recognition mode.

The unit will announce, "Voice command please", followed by a beep sound. After the beep sound, you are now able to speak your command.

 The following commands apply to all voice commands.

■ Call

WARRANTY

The Multimedia system is covered by the same Warranty Period & Km's as the Vehicle's Warranty.

Directed Electronics OE PTY LTD, operates a Warranty Exchange program, with Isuzu Dealerships only.

Isuzu Dealerships will hold Exchange units for a period of 2 weeks only, from the date of booking.

As from 1st January 2012, customers should be aware of the following 2 'Consumer Act' clauses:

- Goods presented for repair may be replaced by refurbished goods of the same type rather than being repaired. Refurbished parts may be used to repair the goods.
- The Repair or Replacement of goods may result in the loss of any data stored on the goods.

Hence – Customer files `Ripped' or Stored, will Not be recoverable from Warranty Exchange units.

Directed Electronics OE PTY LTD, Does not cover any Dealership Extended Warranty programs.

Directed Electronics OE PTY LTD, reserves the right to reject Warranty claims, where the unit has been:

- Tampered with or the Warranty seal broken,
- Misused, abused or altered in any way,
- Damaged as a result of the vehicle's electrical system, poor installation, wiring modification, foreign matter, or use of incompatible or faulty CD/USB/SD devices.

Directed Electronics OE PTY LTD, warrants all products purchased from Dealership Parts and Accessories for 12 months, from the date of sale of the product.

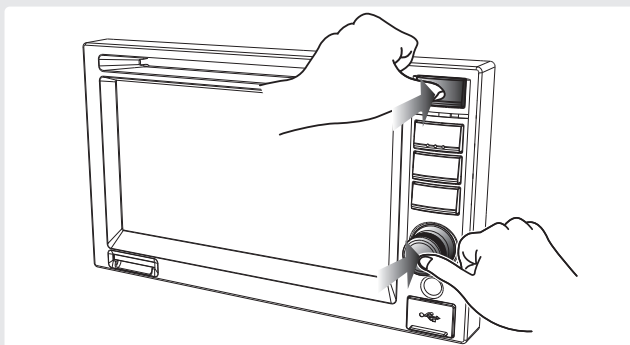

All Multimedia Parts and Accessories are available only from Authorised Isuzu Dealerships.
